

PLUMBING PARTS: THE ESSENTIAL RANGE FROM COMAP

Comap Westco – the leading European manufacturer and distributor of plumbing and heating products – is stocked in-depth with a comprehensive range of plumbing parts.

In addition to the company's core portfolio of heating valves, fittings and systems, Comap consolidates its reputation as a one-stop-shop for merchants and installers with an extensive selection of essential, loose plumbing parts.

Precision engineered, for optimum performance, the range spans every type of product: from wastes, chains and tap conversion kits to float valves and flush kits. Comap can provide a solution for every installation requirement and supplies fundamentals such as syphons, washers, o rings, right the way through to cisterns and pan connectors.

Market leading brands including Opella, Fluidmaster and Multikwik, share shelf space with Comap's premium quality own-label products. Each and every product is pitched at competitive price points, ensuring that installers benefit from both high quality and great prices. Thanks to Comap's purchasing power, it is able to offer excellent break bulk deals and merchants can purchase individual items rather than large packs, helping to free up their working capital.

Comap also provides pre-packed plumbing parts, packaged at the company's headquarters in Leigh. The ultimate in ease of selection for installers and merchandising solutions for merchants – Comap provides everyday products packaged and presented in sensible quantities.

Lee Kenney, managing director of Comap Westco, commented: "At Comap, we continually strive to improve our product range, so that merchants and installers consider us a one-stop-shop. We've had fantastic feedback on both the plumbing parts ranges, as no matter how obscure the item, Comap can provide the solution!"

A 46 page catalogue is available detailing the plumbing parts loose ranges.
