Blowtorch product release

COMAP INTRODUCES NEW FIREPOWER BLOWTORCH TO RANGE

Comap, the leading manufacturer and distributor of heating and plumbing equipment, has introduced a new collection of Firepower Blowtorches to its expanding product range.

The Firepower Cylinder Mounted Blowtorch has an ergonomic and lightweight design which provides easy to use, balanced handling, making it ideal for a wide range of heating, electrical and telecom installations.

With a longer body for improved reach, the Firepower Blowtorch is compatible with both propane and MAP//Pro gases and will also fit most other disposable propane or MAP//Pro cylinders. With piezo ignition, the Firepower Blowtorch provides an instant flame and for convenience also has an ignition button lock which allows straightforward, continuous use for the installer.

Paul Flynn, Product Strategy Manager commented: "Comap is always on the look out for new, high quality products and we're really pleased to introduce the Firepower Cylinder Mounted Blowtorch to our portfolio of customer-focused product options. The introduction of the Firepower blowtorch demonstrates how Comap's customers can rely on us to provide precisely the type of products that they need - via an impressive selection of quality branded tools, as well as Comap's own manufactured products."
